

All eco-coffins

Natural Endings provide a wide range of eco-friendly coffins. We source our coffins from experienced coffin designers and makers, who are all committed to using the most environmentally sustainable materials as possible, with the vast majority being entirely biodegradable.

Material choices are all natural – wooden, willow (also known as wicker), bamboo, banana leaf, cane, cardboard, pandanus, seagrass, or wool. Most of our coffins are certified by the FFMA (Funeral Furnishing Manufacturer's Association) or the CCSA (Coffin, Casket and Shroud Association).

Our eco coffins are available as part a funeral you're arranging with Natural Endings. You can also buy most of our coffins for direct delivery to your chosen funeral service provider, or to your home if you live out of our area. Some of our coffins are available for collection only from our main premises in Todmorden or office address in Stretford.

All coffins are appropriate for cremation, traditional burial, and woodland burial, and are available in a range of sizes.
