

Cane coffins

The Cane eco-coffins featured here are available as part a funeral you're arranging with Natural Endings. You can also buy these coffins or if you live out of our area for direct delivery to your chosen funeral service provider, or to your home. All coffins featured are appropriate for cremation and burial, and are available in a range of sizes.

Cane coffins are certified by the Funeral Furnishing Manufacturer's Association (FFMA) for quality, strength and suitability for purpose.

Cane is very environmentally friendly due to the fact that it grows rapidly, as much a 6 metres a year. Cane grows in degraded forests and in marginal soil, in areas where other land products cannot grow, for example areas that remain flooded for long lengths of time.

Cane clings to tropical rainforest trees and so actively supports the preservation of trees in the rainforest. It can be introduced artificially in natural forests without disturbing the existing natural eco system. It provides income to some of the poorest people living in and on the fringes of the rainforests.

Cane coffin round ended
£659

Cane coffin traditional shaped
